

Parish IQ (Intelligent Query)

Feel like you need a PhD to get the answers you want from your database?

Think. Click. Refine. Use Your Results.

Parish IQ (Intelligent Query) offers the simplest way to build queries in plain English from your ParishSOFT family, member, and contributions data.

Get exactly the data you need—in any combination—in seconds. Parish IQ shows you clear answers to important questions from your staff, so that you can make better -informed decisions with greater confidence in your data.

Parish IQ uses your live data, so results are always current. Best of all, Parish IQ is easy to use, so you can be as creative as you like in your data analysis—without needing expensive consultants or advanced database application skills to get the information you need.

See exactly the data you need, fast

- Queries are built, refined, and ready to use in real time from your common database.
- Query “column” names match the field names in your software, making click-and-go lists highly intuitive for users of all levels.
- Conditions [A and B; A or (B and C)], aggregates (count, sum, minimum, maximum, average), and sort options used alone or in combination give nearly unlimited options for precise, creative data analysis.
- Results execute instantly—so you can test query variations at will until you achieve the results needed.
- Workgroups built from query results provide a snapshot of the data to use for highly targeted communications to families.
- No knowledge of raw database structures or high-level database functionality is required.

Enhance decision-making

- Custom queries that are fast and simple make it easy to gather, report on and share information with teams.
- Dynamic results from new and saved queries are always current and reliable, allowing well informed data analysis and accurate diocesan demographics.
- Email, query import, and global setting provide many ways to share queries for better collaboration. Or you can keep queries confidential for your personal use only.

Boost productivity

- Saved queries update dynamically for unlimited, recurring use.
- Direct access to all of your data offers true, custom reporting.
- Export capabilities let you use your results in Excel™ and Word™-compatible applications.

Parish IQ (Intelligent Query)

Improve participation in Ministries and Stewardship with better data.

Your parish maintains a high-quality database, with detailed census, sacramental, and contributions data for families and individual members. Parish IQ provides a way to pull all of that high-quality data back out of your database, where it can work even harder for you.

Parish IQ is designed to be simple to use, but behind the easy-to-use interface runs a powerhouse custom query builder that any staff person can use to analyze data at its deepest levels. The result is fast answers to nearly any question—no matter how complex. The examples below illustrate some useful ways that parish offices have used Parish IQ to better understand their finances and the people they serve. And with a better understanding of your parish demographics, you can communicate more effectively, targeting just the right people for specific parish needs.

Example 1: Would your youth ministers and school staff like to know how many school age children are in your parish?

Parish IQ can provide just the results you need, for any age range, and you can get your results with individual member names or a total count of the children of each age. The query data at right shows the number of children between the ages of 4 and 18, by age count. Export this data to a Word- or Excel-compatible format to share it with your parish and school staff. The right information can help you better plan for educational programs and sacramental preparation.

Members Age (Fractional Years)	Members Age (Fractional Years) Count
4	3
5	4
6	5
7	5
8	4
9	5
10	3
11	6
12	4
13	3
14	4
15	12
16	9
17	2
18	6

Example 1

Members Last Name	Members First Name	Confirmation (Is Confirmed)	Members Age
Alway	Robert	<input checked="" type="checkbox"/>	17
Anderson	Ethan	<input type="checkbox"/>	14
Bailey	Shawn	<input type="checkbox"/>	15
Bokong	Rachelle	<input type="checkbox"/>	16
Bokong	Scott	<input type="checkbox"/>	18
Blinks	Michele	<input type="checkbox"/>	18
Fear	Gabriel	<input checked="" type="checkbox"/>	16
Francis	David	<input type="checkbox"/>	15
Gabriel	Mary	<input type="checkbox"/>	15
Gabriel	David	<input checked="" type="checkbox"/>	16
Harris	Mary	<input checked="" type="checkbox"/>	16
Haynes	Summer	<input checked="" type="checkbox"/>	16
Ingram	Charels	<input type="checkbox"/>	15
Jackson	Donny	<input type="checkbox"/>	14
Jordan	Paige	<input checked="" type="checkbox"/>	18
Jordan	Chloe	<input checked="" type="checkbox"/>	16
Lin	Keuan	<input type="checkbox"/>	15

Example 2

Example 2: Among the older teens in your parish, age 15-19, who have been baptized but not confirmed?

Parish IQ can tell you instantly. Reach out and provide a special sacramental preparation program for older youth to re-energize their relationship with God. The query data at right shows a list of youth, ages 14 to 18, who are ideal candidates for such a program.

Complete Church Solution

Parish IQ's part of an integrated technology suite that connects churches with staff, parishioners and the communities they serve. Our software includes Family Directory, Offering & Pledges, Time & Talent, Mailroom Solutions, NotifyNow, Online Giving, Parish IQ, MyOwnChurch, ConnectNow Church Accounting and Free Web Solutions.
