

## VERSION 4.6.4 RELEASE NOTES

These release notes keep you informed about the latest features and changes available in Release v4.6.4 of ParishSOFT Family Suite.

### Resolved Issues

---

#### My Own Church

**CNFS-5264 Fixed: System Not Updating Changes to the Member's Cell Phone Number**

We resolved an issue that prevented the system from updating members' records with changes made to the **Cell Phone Number** field in **Member Details**.

#### Offering

**CNFS-8320 CNFS-8758 Fixed: Uploaded Signatures Not Showing in Pledge Statements and Tax Receipts**

Previously, uploaded signature images did not show in both the print preview and printed versions of pledge statements and Canadian tax receipts. We fixed this issue.

**CNG-82 Fixed: ParishSOFT Giving Files Sometimes Fail to Import**

Previously, some files from ParishSOFT Giving failed to import because certain records in the import files contained an unrecognized character in the **Amount** field. This will no longer happen. We modified the import process so that it now correctly handles the previously unrecognized character in this field and imports ParishSOFT Giving files successfully.

#### Development Manager

**DIO-1703 Fixed: Detail CSV Version of the Parish Master Runs Indefinitely**

Some users reported that the detail CSV version of the Parish Master report ran indefinitely until it eventually timed out. This issue was resolved. Users will no longer experience a significant delay or timeout when running this report.

#### Administration

**CNFS-5264 Fixed: Approved Changes to Cell Phone Numbers Not Updated in Members' Records**

We resolved an issue that prevented the system from updating members' records with administrator-approved changes to their cell phone information. Now after a submitted cell phone change is approved by an administrator, the system updates **Cell Phone Number** field in the member's record accordingly.
