These release notes keep you informed about the latest features and changes available in Release v4.7.1 of ParishSOFT Family Suite.

Contents

ParishSOFT Version 4.7.1 Release Notes_last updated March 15, 2021

Family Suite

Resolved Issues

Family Directory

60785 Fixed: Import Contact Information Process Occasionally Generates Corrupt Postal Code Data

Several users reported sometimes experiencing corrupted or missing postal code data after importing family or member contact data. We fixed this issue.

IQ

54813 Fixed: Multi-Part Identifier Could Not Be Bound Error

Users reported sometimes experiencing the following error:

```
Multi-Part Identifier Could Not Be Bound
```

We determined that this error occurred when certain Religious Education fields were used in subqueries that pulled data from columns in the Member and Family groups. This issue was resolved. Queries that combine Religious Education and Family and Member data now run without error.
