What's New

IQ

Distinct Count Option Added to (Function) Menu

As shown below, the IQ Function menu now includes the **Distinct Count** option. When applied, this function evaluates values in the selected column, removes any duplicates, and returns the number of unique values found.

You can apply the Distinct Count function to new and existing queries. Simply, select the column, click , and then select **Distinct Count** from the displayed menu, as shown below:

The results set shows the number of unique values found in the selected column.

Resolved Issues

My Own Church

Fixed: [Link to My Own Church Missing from the Home Page](#)

Some users reported that the link to My Own Church was missing from their **Home** page. We fixed this issue.

Fixed: [Pictorial Directory Button Not Visible](#)

Previously in organizations for which the Pictorial Directory was enabled, some users reported that the **Pictorial Directory** button was missing, so they could not access the directory. We fixed this issue.

IQ

Fixed: [Queries Run Against the Funds > Legacy DUID Column Return Wrong Result](#)

Previously for organizations using the redesigned Development Manager and Offering applications, queries run against the **Funds > Legacy DUID** column returned the new fund ID value instead of the legacy value. We fixed this issue.
