Family Suite

What's New in Version 4.7.6

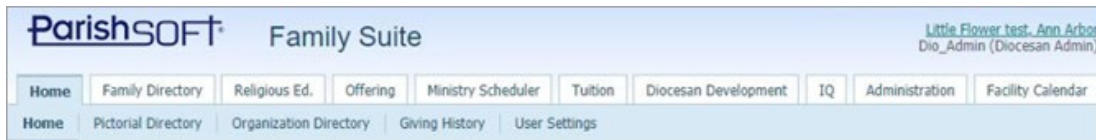

Facility Calendar

Facility Calendar Module Added to Family Suite

This release features a new module added to ParishSOFT Family Suite called **Facility Calendar**. **Facility Calendar** enables parish staff to create an organization-wide calendar that gives members and staff views of all upcoming scheduled activities and events. The module also includes a scheduler feature parish staff can use to schedule meetings and events, book spaces for activities, reserve equipment and other resources, and more to suit an organization's specific needs.

A license is required to use **Facility Calendar**.

- If your organization is licensed to use the module, clicking the **Facility Calendar** tab, shown below, opens the module's **Login** page.
- If your organization is not licensed to use the module, clicking the **Facility Calendar** tab, shown below, displays an **Information** page that provides information about its features.

Resolved Issues

IQ

Fixed: Duplicate Pledge Records Appear in Results Set

Previously when querying pledge data, organizations that migrated from Family Suite Offering to the redesigned Offering application reported having results sets with duplicate pledge records. This issue was resolved.

Fixed: Queries Returning Incorrect Pledge Goal Results

Previously, queries that pulled data from the **Fund > Organization Summary > Pledge Goal** field returned results for the diocese instead of results for parishes. We fixed this issue.
