Family Suite

Resolved Issues

Religious Education

Fixed: [Select Classes Function Not Working Consistently on the Classes Tab](#)

We fixed the issue that caused the select function to work inconsistently on the **Classes** tab. Some users reported that when they tried switching to a different class, the system sometimes did not replace the currently selected class with the newly selected one. Then, the system occasionally timed out and displayed this error message: `Browser Session Expired`.

IQ

Fixed: [Initial Pledge Date Column Returns No Data from Redesigned Family Suite Applications](#)

Previously, when users of the redesigned Offering and Development Manager applications applied the **Pledges > Initial Pledge Date** column as a condition to their pledge data, their queries returned an empty result set. This issue was resolved.
