Resolved Issues

Family Suite

General

Fixed: Error: 'Document with same documentID is already open'

We fixed the issue causing this error users sometimes experienced when trying to perform certain Family Suite tasks, such as adding a new record requiring access to a specific text field or creating mail merge documents:

```
Document with same documentID is already open
```

IQ

Fixed: Query Execution Error Sometimes Experienced

Users reported sometimes experiencing a `Query Execution Error` when **Sacrament Notes** results were constrained to include unique records only. We resolved this issue. Applying the **Unique Records Only** checkbox to **Sacrament Notes** results now returns unique records for the column without generating an error.
