Tuition Fund Fields Added

In the Column Picker, the **Tuition > Invoice and Invoice Items** group now includes the following fund fields represented as data elements in ParishSOFT Tuition:

- **Fund ID** (corresponds with the **Fund #** field in the Tuition application)
- **Fund Account Code** (corresponds with the **Fund ID** field in the Tuition application)
- **Fund Account Description** (corresponds with the **Description** field in the Tuition application)
- **Fund External Account 1** (corresponds with the **External Fund 1** field in the Tuition application)
- **Fund External Account 2** (corresponds with the **External Fund 2** field in the Tuition application)

With the addition of these fields, you can now write simple queries that retrieve fund data from your Tuition database. You can also build complex queries by combining these fields with other Tuition fields (for example, **Families** and **Members**) and (optionally) applying them as query conditions.

Resolved Issues

Ministry Scheduler

Fixed: Manual Schedules Display Incorrect Data and Incomplete Name Values

Users reported experiencing these issues when working with manual schedules:

- In the **Ministers Available for The Selected Event** grid, data in some of the column fields do not correspond to their column headers. For example, minister's first names incorrectly appear in the **Last Name** column. We fixed this issue.
- Messages displayed to users to inform them about a minister's scheduling conflicts include the minister's nickname only. We fixed this issue. Scheduling conflict messages now include the minister's complete name; that is, either their nickname followed by their last name or, if no nickname is available, their first name followed by their last name.

Contacting ParishSOFT

If you have questions or require support while using the application, use any of the following methods to contact us:
