# Resolved Issues

---

## Development Manager and Offering

### Reports

**Fixed:** [Contribution History by Donor Report Shows Incorrect Amounts for Some Donors](#)

We resolved the issue that caused the **Contribution History by Donor** report to show incorrect contribution amounts for some donors.

### Imports

**Fixed:** [Multiple Clicks of Checkmark Button Creates Multiple Identical Batches](#)

Previously, multiple clicks of the Checkmark button while an import was in progress caused the system to create a duplicate batch entry for each click. We resolved this issue. The system now disregards additional clicks of the button until the import is done.

## Development Manager Only

### Imports

#### **Fixed:** Adjustments Not Applied in Certain Instances to Pledge Amounts After File Import

Previously, the system did not adjust a family's existing pledge if the pledge amount in the import file was equal to the initial contribution to the pledge. We resolved this issue. The system now adjusts the existing pledge according to the imported pledge amount.

## Offering Only

### Home

#### **Fixed:** Organization Dropdown List Won't Let Users Switch Parishes

Previously, the Organization dropdown list did not allow users with an active assignment to more than one parish to switch to the other parishes and view their data. We fixed this issue.

## Contacting ParishSOFT
