# Resolved Issues

---

## Development Manager and Offering

### Reports

#### Fixed: Some Pledge Statement Report Filters Not Working As Expected

We fixed the issue that prevented certain filters in the **Pledge Statement** report from working as expected, which caused some pledges to be missing from the exported report.

#### Fixed: Inaccurate Counts and Amounts in Dollar Range Report

We fixed errors in the **Dollar Range** report that caused inaccurate and inconsistent reporting of counts and range totals.

### Batches

#### Fixed: 'Created Date' Filter Applied to Batch List Not Working

We fixed the issue that prevented the **Created Date** filter on the **Batch List** page from working as expected.

### Pledges

#### Fixed: Duplicate Records Appearing in Pledge List Export

We fixed the issue that caused the Pledge List export (Excel version) to include a small number of duplicate pledges.

## Offering Only

### Application-Wide

#### Fixed: Organization Dropdown List Includes Organizations Unlicensed for Offering

Previously, the Organization dropdown list included every organization the logged-in user had an assignment to—even organizations not licensed for Offering. This oversight allowed the user unauthorized access to Offering within organizations unlicensed for the module. We fixed this issue. Organizations not licensed for Offering no longer appear in the Organization dropdown list even if the logged-in user has access to Offering through an assignment in a licensed organization.
