What's New in Version 2.42

Development Manager and Offering

Pledges

New Rules Control Editability of the External Pledge ID Field

We added new rules that control the editability of the **External Pledge ID** value in the pledge record, specifically:

- Duplicate **External ID** values are not allowed. If you try to save a value in the **External ID** value that is assigned to another pledge, the system displays this warning:

`This External ID is already in use by a different pledge.`

- The **External ID** field now accepts a null value. If you delete an existing value in the field and save the pledge record, the system accepts the change.

Development Manager

Reports

'Contribution Type Details' Column Removed from Contribution Detail Statements Setup

In a prior release, we intentionally disabled printing of the **Contribution Type Details** column in the **Contribution Detail Statement** report because users considered the information to be an unnecessary reporting requirement. In this release, we removed the column from the **Report Contents > Column Selection and Reordering** tab in the report setup to make it clear that the column cannot be selected for inclusion on donor contribution statements.

Resolved Issues

Development Manager and Offering

Reports

Fixed: Tax Receipt Summary Not Exporting When 'All Funds' Option Selected

Previously, the user experienced an error when trying to export a **Tax Receipt Summary** report for all funds.
